Eon IT— ISMS Offerings

HELPING CUSTOMERS GETTING MOST OF ISMS

{ **ISO 27001** }

We believe in providing hardcore consultancy which actually brings value to the business and not to help you get a rubber stamp of ISO 27001

Why Eon IT

⇒ Team of hard core consultants

⇒ Work with you not for you

⇒ Practical knowledge

⇒ Innovative Methodologies

⇒ Focus on knowledge transfer

Information security flaws can result in escalating financial losses and wreak havoc with business operations. ISO/IEC 27001:2005 standard for information security management systems can help organizations plug existing leaks and prevent future threats that can prove to be extremely damaging and harmful.

Eon IT flexible Offerings
matching your business needs

A to Z Consulting

As the name suggest, in this approach Eon IT consultants would implement ISMS with a fixed scope and perform all the activities to implement ISO 27001 in your organization.

With our experience of working very closing with ISO 27001 standard, we have developed a Nine Step consulting package which deliver the core essence of this standard in a very user friendly way.

Fast track 27001

Eon IT's Fast track 27001 service make certification easy and approachable for you. We provide hassle free, high speed and value for money consulting with guaranteed certification.

This unique service removes the needs for your organization to invest significant time, money and efforts in researching and acquiring skill –set necessary to do this all on your own.

Trainings

Eon IT is proud to have delivered IRCA certified ISO 27001 courses in Oman. We have a pool of qualified and experienced trainers available to deliver hands on training to our customers.

ISO 27001 Readiness Assessment

This provides information as to how an organization's current practices compare to ISO 27001 certification requirements. Eon IT perform this just before an organization is ready for the final audit.

Risk Assessment

We provide a comprehensive assessment based on ISO 27005. Risk Assessment is the fundamental part of ISO 27001 and also for Business Continuity Planning, which is another very strong area of Eon IT

Certificate Maintenance

ISO 27001 certification is not a one time activity, it's a continuous improvement program. Eon IT certification maintenance services will provide effective methodology to improve existing ISMS by incorporating latest tools, guidelines and practices in the existing system .

Scope Extension

Eon IT provides comprehensive and easy approach for extension of existing certification scope to cover major aspects of Information security in your organization. A
