

Learning Management System

OVERVIEW

Introduction

We offers easy to use online learning solutions designed to help small and large organizations build and distribute online training courses.

Our user friendly software and support network will help you to create highly interactive online courses quickly, easily and affordably.

Our Consulting Approach

Fact | Specific | Result based | Continual Improvement

Online Course

Whether you are a large corporation offering constant learning and training opportunities for managers and employees or you are a small business, you will find that Eon IT's WSIWYG (What You See Is What You Get) online learning software makes it easy to produce media rich, engaging online courseware at minimal cost and without having to rely on programmers or multimedia experts.

Changing Content online

Teachers can change the contents at any time using our authoring tool that is available to them; and because it is online, they use it from anywhere, on any platform or operating system, so long as they have a browser.

Eon IT LMS allows institutes and organizations to complete automate the training delivery method and be able to track and report the learning.

Easy Reporting

Find out

- How many students have enrolled?
- What is the avg time the spend
- Who passed
- Who scored over 80%

And a lot more, Eon IT LMS is 100% reportable as per your requirement

Branding and Look & Feel

Eon IT LMS can be branded with your organizations color theme and corporate identity. Themes can be created which can be applied at any course as per your requirement

Build branching simulations and case-studies, interactive quizzes, and complex assessments

Flexible templates allow users to effortlessly present material to learners, engaging them with interactions, and immersing them in branching scenarios. The system is perfect for corporate trainers, software trainers, human resource managers, curriculum designers, sales professionals, account managers and small businesses. You are able to easily import existing curriculums and PowerPoint presentations. All this can be done with no technical knowledge.
