

Eon Tracker

MAKE TRACKING EASY FOR ORGANIZATION

Eon Tracker is a powerful, easy-to-use web-based software that helps organizations to track business issues, monitor the progress and automatically manage issues ensuring resolution.

After every assessment or audits, organizations gets a pile of issues, non conformity and vulnerabilities that needs to be resolved by different departments within the organization. The biggest problem is “How to assign tasks” and “How to monitor the progress”. Eon Tracker helps companies to assign the issues to the respective department, monitor the progress and provide KPI based graphical reporting to the stakeholders.

Track the Issue Resolution Monitor Progress—Achieve Results

Portal Architecture

Eon Tracker is a web based software that supports any popular web browsers. Once the server is up and running Eon Tracker is accessible from any client machine within the network. Eon Tracker can also be plugged as web part to be used in Microsoft SharePoint Environment.

Integration with LDAP

Eon Tracker can be easily integrated with LDAP, more commonly used with Microsoft Active Directory. This subsequently helps organizations connecting it with Email solution and enabling auto emails sending to the respective recipients after the rule is defined.

Graphical Reporting

Eon Tracker generate reports and create dynamic dashboards to present the real time data to monitor the progress on executive table.

Deadline / Task Assignment

This useful feature of Eon Tracker allows the user to upload the issues on the server and assign it to the respect stakeholder to fix it as per the set schedule and deadline.

Email Reminders

Eon Tracker sends a auto email to when a task is assign to the relevant person to constantly remind him about the task and deadline.

User Friendly Interface

Eon Trackers well-designed interface provides the user with a clear set of commands that can be used to navigate effectively while simultaneously guiding the user through the critical path.

Role Based Privileges

Multiple users can work on Eon Tracker and their rights will be managed according to their role in the organization as per the requirement of a comprehensive Role based privilege system.

Eon Tracker is ideal for those organization who have compliance requirements, i.e. ISO, Information Security etc and they need to resolve multiple issues within large organizations
