

ISO 27001 Certified ISMS Lead Implementer Course

Overview

This course enables participants to develop the necessary expertise to support an organization in implementing and managing an Information Security Management System (ISMS) based on ISO/IEC 27001:2013. This two-days intensive course enables participants to lead an ISO/IEC 27001 ISMS project and to help the organization mitigate cybercrime risks.

Contents

- ✓ Understanding the concepts, methods/techniques for managing ISMS.
- ✓ The role and structure of an information security policy.
- ✓ How to allocate roles & responsibilities in an ISMS implementation.
- ✓ The definition of 'risk' under ISO27001:2013 and how to carry out the risk assessment – the core competence of ISMS.
- ✓ Statement of Applicability (SOA).
- ✓ Writing policies and producing other mandatory documentation.
- ✓ Reviewing your existing controls and mapping controls to Annex A.
- ✓ Manage and drive continual improvement under ISO27001:2013.
- ✓ How to prepare for the ISO 27001 certification audit.
- ✓ Hands-on business examples and case studies.

Who should attend?

It is especially relevant for those who have the responsibility to implement information security management in a business or provide consultation on the subject. Anyone involved in information security management, writing information security policies or implementing ISO 27001.
